PRICE LIST
THE ELM CITY
NURSERY CO.
NEW HAVEN
CONNECTICUT

Important to Purchasers.

Sugar Maple.

PRICES—NOTE CAREFULLY. Single-rate prices are for less than five of a kind.

Ten-rate prices are for five or more and less than twenty-five of a kind.

Hundred-rate prices are for twenty-five or more and less than 250 of a kind.

Thousand-rate prices are for 250 or more of a kind.

We cannot agree to fill small orders for a few of a kind for less than single rates as it oftentimes takes one over many acres of ground to fill a single order, and the proportionate expense of digging and packing orders must be taken into account.

SPECIAL DISCOUNTS ON TREES AND PLANTS. To those who send us orders for less than five of a kind, shipped at the same time, amounting to the following :

| | |
|---|-------------------------------|
| Orders amounting to \$10.00, a discount of 5% | } FROM SINGLE RATE PRICES. |
| Orders amounting to \$30.00, a discount of 10% | |
| Orders amounting to \$50.00, a discount of 15% | |
| Orders amounting to \$75.00, a discount of 20% | |
| Orders amounting to \$100.00, a discount of 25% | |

Special discounts on larger orders. Send us list for estimate.

These discounts apply to Trees and other Plants only, and not to grass seed, fertilizers, etc.

Trees and Plants individually selected at our nurseries or special quotations will be charged for according to quoted price without discounts. This does not mean that the rates will necessarily be advanced.

TERMS. Cash in advance from unknown parties who do not furnish satisfactory reference. We send invoice at time of shipment of order, and should any error be noticed on receipt of goods notify us immediately and we will do all in our power to rectify it.

HOW ORDERS ARE SHIPPED. We ship all large trees and other bulky orders, which are to go outside the city, by freight, unless otherwise requested. Medium sized orders can be shipped by express to advantage; this way is especially advisable where immediate arrival is desired. All orders are delivered free to local freight and express companies. We are not liable for delays by forwarding parties. If not promptly received notify us and we will promptly trace.

PACKING. We make no charge for packing *except where stock is purchased at hundred-rate prices or in the case of large bulky stock, or where we are requested to ship with carefully preserved balls of earth, etc.,* which necessitates devoting more time and packing material than is usual. In such instances a charge covering actual cost is made.

ORDER EARLY. Do not wait until you are ready to plant before ordering, but place your order as far in advance as possible. We will hold such orders subject to further directions if requested. The actual shipping season is so short that much is gained both to the planter and the nurseryman when orders are booked as far in advance as possible of the actual planting season.

HOW TO REACH US. Our nursery and office are located at EDGEWOOD, Edgewood Avenue, just beyond Edgewood Park. The Edgewood Avenue cars direct to the nursery from the Railroad Station, and by transfer at the New Haven Green. Parties autoing, driving or wheeling to the nursery will find West Chapel Street the better route, turning to the right at either Central or Alden Avenue.

IF OUT OF A VARIETY, May We Substitute? Some special variety may be out of stock when an order reaches us, in which event we send order short unless purchaser requests us to select another variety equally as good. Many times it is better to leave variety to our selection, the customer gaining the advantage of our experience.

LANDSCAPE DEPARTMENT. All inquiries for this work are turned over to Ernest F. Coe, Landscape Architect, care this office.

Scarlet Oak.

The Pin Oak is by far the most planted

of all the native oaks. Graceful in form, glossy, deeply-

pinnated foliage, changing from green to rich crimson

in the autumn.

QUERCUS PEDUNCULATA (English Oak)

Lives to great age and is a noble tree.

QUERCUS PEDUNCULATA VAR. CONCORDIA

One of the best yellow foliaged trees.

QUERCUS PEDUNCULATA VAR. FASTIGIATA

This form of the English oak is quite pyramidal and

makes a striking form in contrast with other forms.

QUERCUS PRINUS (Chestnut Oak)

QUERCUS RUBRA (Red Oak)

RED-BUD, see Cercis.

ROBINIA PSEUDACACIA (Locust Acacia)

Very rapid-growing tree with attractive pea-green foliage

and showy racemes of fragrant wistaria-like flowers.

Ask for special prices for forestry planting.

ROBINIA HISPIDA (Rose Acacia)

Shrub-like, flowers rose-pink in racemes.

ROSE ACACIA, see Robinia.

SALISBURIA, see Ginkgo.

SALIX BABYLONICA (Weeping Willow) Specimens, 15 to 25 feet, \$2.00 to

The well-known weeping willow is useful in many

places, its long drooping branches creating a pronounced

effect.

SALIX ELEGANTISSIMA (Thurlo's Willow)

A very beautiful willow, similar to Babylonica but

somewhat more upright and considered more hardy.

SALIX MUTABILIS (European Pussy Willow)

The most showy of all the Pussies.

An observer will quickly note the importance of Evergreen Trees in the landscape. Their forms are strong in outline and the color and texture of their foliage is rich and beautiful. It is, however, in the winter season that their charms are most conspicuously displayed. At this season the dark rich greens and bronzes of their foliage lend a richness to the landscape and so often form a delightful background for the gray trunks and branches of other trees which stand out in bold relief, or perhaps a clump of richly colored berry-laden bushes which owe much of their effectiveness to such a background.

Again, Evergreens if properly used can be made to serve for a windbreak, very much modifying the effects of extreme cold and the force of the wind, consideration for bleak situations, thereby combining opportunities for beauty and economy.

When to Plant.

THE question of just when to plant to get the best results is so important that those who have little experience along these lines will be glad of advice. If you are ready for your plantings in the spring by all means do it done then, but if conditions are not convenient until later in the season, it is better to attend to it then rather than wait until another spring.

SPRING PLANTING. Practically all kinds of Hardy Trees and other Hardy Plants can be planted to advantage any time after the ground is free from frost and up to the time that the foliage is well started. It is, however, always advisable to get one's plantings made as early in the season as possible. Sometimes it so happens that orders reach us too late for successful spring planting, in which event, we hold the order over until the early fall planting season.

AUGUST AND SEPTEMBER are desirable months for the transplanting of practically all the Hardy Herbaceous Plants, Strawberries (pot grown) and Evergreens. The weather conditions are favorable, including sufficient rainfall resulting in the newly transplanted plants getting a firmly established root growth before cold weather. The many advantages of planting at this season are really very important.

OCTOBER, NOVEMBER AND DECEMBER offer a very desirable season for transplanting of practically all kinds of Hardy Deciduous Trees, both fruit and ornamental, Vines, Shrubs, Roses, etc. And again at this season of the year there is usually less hurry in the garden than in the spring, and it is worth while to anticipate the spring rush and get such work as can be done in the fall out of the way.

We are always glad to advise with those seeking information on this important question of planting.

Hardy Herbaceous Plants.

Hollyhock,
see *Althaea*
below.

ALL plants whose roots are hardy and remain alive from year to year and whose tops die annually to the ground are classified under this heading. It includes such splendid garden plants as Paeonies, Iris, Larkspurs, etc. The great ease with which these plants can be grown and their great variety of color and form and season of bloom make them indispensable for the garden. Of late years, there has been a steadily increasing demand for this class of plants as well as a great improvement in the varieties, so that they now make an important feature in the business of many nurserymen. We are making a specialty at the nursery, growing them in large quantities out in the open fields under the most favorable conditions. The classification is the one adopted by Prof. L. H. Bailey in the *Cyclopedia of American Horticulture*.

Height at flowering season and time of blossoming, general color of bloom, and very brief descriptions only are attempted in this abridged list.

Alphabetical List.

A. **ACHILLEA FILIPENDULINA** (Fern-leaved Yarrow). 3 to 5 feet. June to September.

This is a very decorative plant, clear yellow, producing flat corymbs. ***ACHILLEA MILLEFOLIUM VAR. RUBRA** (Red Yarrow). 1 to 3 feet. June to October. Aromatic, fern-like foliage, which is very ornamental.

***ACHILLEA PTARMICA VAR. FL. PL.** (Pearl). 1 to 2 feet. May to Oct. Double white. A very effective plant, especially when in bloom. Much prized as a cut flower.

ACHILLEA TOMENTOSUM (Woolly Yarrow). 8 to 10 inches. June. Handsome cut foliage and bright yellow flowers.

ACONITUM AUTUMNALE (Monk's Hood). 5 to 6 feet. September, October. Deep blue and a stately showy plant.

ACONITUM FISHERI. 4 to 6 feet. August and September. Light blue.

ACONITUM NAPELLUS (Monk's Hood). 3 to 4 feet. June to July. Deep blue. Resembles Larkspur.

ACONITUM NAPELLUS BI-COLOR (Monk's Hood). 3 to 4 feet. July and August. Blue, mottled with white.

ACONITUM NAPELLUS VAR. ALBUM. Like preceding; flowers almost white.

ADAM'S NEEDLE, see *Yucca*.

***AEGOPODIUM PODAGRARIA VARIEGATA**. One foot. Splendid for covering the ground under trees. Will grow almost anywhere.

ALTHAEA (Hollyhocks).

Always a popular garden plant and while they are grown from seed it takes one season of growth before they will bloom. There is always, therefore, a demand for plants of a blooming size. They require a very rich soil to get the best results. Following colors: Double crimson, red, white, yellow; single mixed; double mixed; Allegheny—semi-double.

ALYSSUM SAXATILE (Golden-tuft). $\frac{1}{2}$ to 1 foot. May and June.

Forms a clump of velvety foliage and flowers are the richest yellow and fragrant.

***AMSONIA ANGUSTIFOLIA**. 2 to 4 feet. Glossy, willow-like leaves, forming a bushy mass of foliage. Flowers white. June.

ANEMONE JAPONICA. 2 to 4 feet. September and October. Graceful and charming in every way. Thrives best in well drained soil and protected exposure.

Varieties well established from 4-inch pots, large enough to bloom freely first season planted.

Each, 25c.; per 10, \$2.00; per 100, \$15.00.

Alba. Pure white petals, yellow center. **Rubra**. Light rose petals.

Queen Charlotte. Semi-double, pink.

Whirlwind. Pure white semi-double.

ANTHEMIS TINCTORIA ALBA. 2 to 3 feet. July to October. Creamy white.

ANTHEMIS TINCTORIA VAR. KELWAYI. 2 to 3 feet. July to October. Brilliant

yellow daisies in great masses, splendid for cutting.

***APIOS TUBEROSA**. 6 to 8 feet. July. Of climbing habit and with wistaria-like foliage.

Blooms in clusters of pea-like flowers of a reddish chocolate color.

AQUILEGIA COERULEA. 1 to 2 feet. May to September.

This is the Rocky Mountain Blue Columbine with the long spurs.

AQUILEGIA COERULEA HYBRIDA. 1 to 2 feet. May to September. A great variety of shades from deep blue to rose.

***AQUILEGIA CHRYSANTHA**. 2 to 3 feet. May to September.

Another Rocky Mountain Columbine with long yellow spurs.

AQUILEGIA CHRYSANTHA VAR. ALBA. 2 to 3 feet. May to August.

A light or white form of the preceding.

AQUILEGIA VULGARIS (European Columbine). 1 to 3 feet. June to August. Rose, blue, white, assorted colors.

***ARABIS ALBIDA** (Rock Cress). $\frac{1}{2}$ to 1 foot.

A beautiful low-growing plant with velvety foliage which is evergreen. Becomes a mass of snow-white in April, making it one of the earliest of our garden plants to bloom.

ARENARIA GRANDIFLORA (Sandwort).

Close-growing evergreen plant, forming a carpet of verdure. Very desirable for rock work. Flowers pure white, standing well above the foliage in early spring.

ARMERIA FORMOSA. 6 to 12 inches. July and August.

Bright pink. Fine for borders, also effective in rockery.

ARMERIA MARTIMA SPLENDENS. (Thrift). 9 inches high.

They flower more or less continuously from early spring until late in the fall. Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff, wiry stems.

Very effective in the rockery and indispensable in the border.

***ARUNCUS SYLVESTER** (Spiraea Aruncus). 5 to 6 feet. May and June. Creamy white. A desirable, strong-growing plant, either for the border or for the shrubbery.

ARUNDO DONAX (Giant Reed). 8 to 20 feet. Decorative tall grass or reed.

***ASCLEPIAS TUBEROSA** (Butterfly Milkweed). 2 to 3 feet. July and August. Orange.

ASPERULA ODORATA (Sweet Woodruff). 6 to 8 inches. May and June. White.

ASTER ALPINA. 6 to 8 inches. May to June. Low growing plants; fine for border; effective for rockery. Flowers bright purple, rich yellow center.

The above Hardy Herbaceous Plants are offered in three sizes, as follows, unless otherwise noted. The very heavy field clumps can only be supplied in the sorts marked with a * to the left.

HARDY HERBACEOUS PLANTS.

- ***FUNKIA UNDULATA VARIEGATA.** 8 to 12 inches. One of the best variegated-leaved plants. Attractive for the border.
- GAILLARDIA ARISTATA** (Blanket Flower). 2 to 3 ft. July to Oct. Bright red, yellow splashes.
- GEUM HELDREICHII.** 10 to 12 inches. May to August. Pretty border plant, producing beautiful orange-colored flowers.
- GEUM HELDREICHII SPLENDENS.** New variety even more showy than preceding.
- GERMAN IRIS,** see *Iris*.
- GIANT REED,** see *Arundo*.
- GOLDEN-GLOW,** see *Rudbeckia*.
- GOLDEN ROD,** see *Solidago*.
- GRASS SEED,** see page 36.
- GRASSES,** see *Erianthus* and *Miscanthus*.
- GROUND IVY,** see *Nepeta*.
- ***GYPSOPHILA PANICULATA.** 3 to 4 feet. July to October. Known as *Infant's Breath*. Produces a mass of the smallest white flowers so disposed as to form a veritable cloud of bloom. Keeps well when cut.
- GYPSOPHILA PANICULATA FL. PL.** 3 to 4 feet. July to October. A new double form and very desirable. 50 cents.
- HARDY FERNS,** see *Ferns*.
- ***HELENIUM AUTUMNALE** (Sneezeweed). 6 to 7 feet. August and September. One of the best tall-growing garden plants. Flowers golden yellow; in large masses.
- HELENIUM GRANDICEPHALUM CUPREUM.** 3 to 4 feet. July to September. This new variety of *Helenium* produces coppery red flowers of a rich shade.
- ***HELIANTHUS MAXIMILIANI.** 4 to 6 feet. August to October. Fine golden yellow, valuable late flowering plant.
- HELIANTHUS MULTIFLORUS FL. PL.** 3 to 4 feet. August to October. Resembles *Golden-Glow*, but more double and less tall grower.
- ***HELIANTHUS ORGYALIS.** 5 to 7 feet. October and November. The tall flower spikes of the plant produced so late in the season with their medium-sized, sunflower-like blooms, disposed all along the stems, make it especially useful.
- ***HELIOPSIS LAEVIS.** 4 to 5 feet. July to November. Another good hardy plant with rich yellow daisy-like flowers in great profusion.
- ***HELEBORUS NIGER** (Christmas Rose). 6 to 12 inches. October to March. This interesting plant really produces its flowers in the winter, out of doors. Dainty begonia-like blooms, almost hidden in a clump of glossy evergreen leaves. It is best to select a place for this plant which is sheltered from the winds in winter and where it can remain for years undisturbed.
- The following *Day-lilies* are all very desirable.
- HEMEROCALLIS AURANTIACA VAR. MAJOR.** 2 to 2½ feet. June and July. Rich orange yellow, new and rare. Strong plants 50 cents.
- HEMEROCALLIS DUMORTIERII** (Early Yellow Lily), Japan. 1 to 2 feet. June. Deep yellow and fragrant. Makes a splendid foreground plant.
- HEMEROCALLIS FLAVA** (Lemon Lily). 2 to 3 feet. June and July. Pale lemon yellow; fragrant. This old garden favorite is most effective when grown in generous masses.
- HEMEROCALLIS FULVA** (Orange Lily). 2 to 4 feet. July and August. This grand old lily is now much in demand for naturalizing in large masses and when wanted in large quantities we will be glad to quote special prices.
- HEMEROCALLIS FULVA VARIEGATA.** 2 to 4 feet. A form of the above with variegated green and white foliage.
- HEMEROCALLIS FULVA VAR. KWANSO.** 2 to 4 feet. July and August. Orange red; semi-double.
- HEMEROCALLIS ORANGE MAN.** 1 to 2 feet. July and August. Rich orange.
- HEMEROCALLIS MIDDENDORFIANA.** 1 to 2 feet. June to July. Deep golden yellow.
- HEMEROCALLIS MINOR** (Early Lemon Lily). 1 to 2 feet. Early June. Lemon yellow.
- HEMEROCALLIS THUNBERGII** (Late Blooming Lemon Lily). 2 to 3 feet. Late June and July. Lemon yellow.
- HEUCHERA SANGUINEA** (Coral-Bells). 1½ to 2 feet. July to October. The foliage of this plant in itself makes it worth having. The leaves are circular, with delicately fringed edges and of an attractive grayish marbled green and evergreen. The flowers are coral red, small, and produced in loose clusters on delicate, graceful stems.
- HIBISCUS MOSCHEUTOS** (Marsh-Mallow). 3 to 5 feet. July to September. Rosy pink.
- ***HIBISCUS MOSCHEUTOS VAR. CRIMSON EYE.** 3 to 5 feet. July to September. Like the preceding in form and habit in growth. The flowers, however, are much larger. Of the purest white, excepting at the center, which is crimson.
- HOLLYHOCKS,** see *Althaea*.
- HYACINTHS,** see special list, ready August 15th.
- IBERIS SEMPERVIRENS** (Candytuft). 6 to 12 inches. April and May. White; evergreen foliage. Makes a nice foreground border plant.
- ***IRIS CRISTATA.** An interesting very dwarf species, but 3 to 6 inches high, pale blue, about the earliest to flower.
- IRIS GERMANICA** (Varieties of German Iris).
- NOTE.—In describing these *Iris* O. S. stands for outer segments; I. S. for inner segments.
- AURIOLE.** Late, medium dwarf, very similar to *Sans Souci* in form and color, with the exception of the O. S., which are beautifully penciled deep velvety purple.
- BLUE-BIRD.** Medium to tall and quite early; I. S., very large, full and incurved and of a clear deep blue color; O. S., large, closely reflex and of a deeper velvety blue suffused with enough of the royal purple to add to its richness of coloring.
- BRIDESMAID.** Medium to tall, mid-season; I. S., very full and incurved, light rosy blue, changing to deeper blue on the margins, which are exquisitely penciled; O. S., almost white, distinctly penciled with deep blue in a most interesting way.
- CANDICANS.** Mid-season and medium size of growth; I. S., very little incurved and of the clearest pale blue; O. S., deepest royal purple, freely veined with splashes of pure white. Very distinct.
- DECORA.** Medium to low, mid-season; I. S., clear blue; O. S., white veined with rosy purple, very free flowering.
- IRIS GERMANICA**—Continued on next page.

I TO L

HARDY HERBACEOUS PLANTS.

IRIS GERMANICA—Continued from preceding page.

- EDITH COOK.** Medium to low grower, mid-season to late, of strong, vigorous habit; I. S., of the clearest deep yellow, slightly incurved; O. S., broad and spreading, freely splashed and veined with the deep rosy purple on a white background and bordered with deep old gold.
- ERNEST BERNOT.** Early to mid-season, medium to tall, very free bloomer; I. S., delicate orange exquisitely suffused rosy purple; O. S., creamy white, intricately and freely veined with the deepest royal purple.
- GARFIELD.** Tall, medium to late; I. S., light blue, changing to rosy lilac on margins; O. S., rich royal purple, light beard.
- LA VALETTE.** Tall, late, good full form; I. S., very full and incurved; O. S., somewhat flaring, general color, a clear pale blue, slightly suffused with rosy tints.
- MAD.-CHEREAU.** Late and tall, of beautiful and unique form; I. S., pale blue and so penciled with darker blue on the margin as to suggest fine embroidery; O. S., similar but a little lighter. A most distinct sort.
- MAD. MODESTE.** Medium to late; I. S., incurving, pale blue splashed and margined purple; O. S., white, margins penciled purple.
- PALLADA.** Very late and tall. Resembling the early Florentine in its full large form. Color, strong, rich blue; O. S., being suffused with a slight suggestion of velvety royal purple.
- POND POINT.** Tall, very vigorous, very large and handsome; I. S., clearest deep blue and well-formed; O. S., white at base, veined with royal purple which suffuses the rest of the segment.
- QUEEN OF GYPSIES.** Tall and late; I. S., rich old gold, delicately suffused and penciled with rosy lilac; O. S., clear lilac overspread with beautiful pencilings of a deeper hue, interlaced with white and some chestnut markings.
- SANS SOUCI.** Medium to late season; I. S., clearest intense yellow, incurved; O. S., deepest yellow splashed with white at base, intermixed with russet veining, this veining quite covering the segment towards the outer margins. Medium to low in habit of growth and one of the best in its class.
- SILVER KING.** Similar if not the same as Florentine. The earliest of the tall large type, of ideal full form, and when first unfolding is of the softest pale blue, becoming almost white at maturity. Very fragrant.
- WALNERI.** Mid-season and medium grower; I. S., incurving and of a clear light blue towards the tips; O. S., clear white at base, abruptly changing to clear blue suffused with royal purple, richly veined with deeper color.
- Also many other varieties similar in general effect to the above. List on request.*
- IRIS LAEVIGATA**, or Japan, see page 29.
- IRIS KAEMPFERI**, see page 29.
- IRIS PUMILA.** 6 to 12-inches. April and May in the following hybrids.
- | | |
|------------------------------|------------------------------|
| Cyanea. Deep purple. | Florida. Lemon, shaded blue. |
| Exburna. White, shaded blue. | Formosa. Light blue. |
| Excelsa. Golden yellow. | |
- ***IRIS PSEUDACORUS.** Very robust, flowers of medium size, intense clear, deep yellow.
- ***IRIS SIBERICA.** Robust growers, foliage somewhat like the Japan Iris but more slender flowers, borne on 2 to 3 foot slender stems, well up above the foliage; color, clear rich blue. Flowers are somewhat larger than our native field Iris. In bloom with the late German Iris. Very desirable and especially so for naturalizing along ponds, etc.
- IRIS SIBERICA ALBA.** Similar to preceding but white.
- IRIS SIBERICA FL. PL.** Double form. Blooms late with the Japan Iris.
- IRIS SIBERICA VAR. ORIENTALIS.** A beautiful Iris of the most vivid velvety deep blue, of medium size and blooming with great freedom about June 10 to 20.
- JACOB'S LADDER**, see Polemonium.
- JAPAN IRIS**, see *Iris Laevigata*, page 29.
- JONQUILS**, see special Summer List, ready August 15th.

- LATHYRUS LATIFOLIUS** (Perennial Pea). 5 to 6 feet. June to October. Rosy pink.
- LAWN GRASS SEED**, see page 36.
- LEMON LILY**, see Hemerocallis.
- ***LESPEDeza SIEBOLDI** (Desmodium) Pea Shrub. September and October.

While it is a true herbaceous plant the growth is so full and shrublike that by Fall it has made a bushy plant from 3 to 5 feet high.

Covered with wine red, pea shaped bloom which makes it very attractive. It is effective planted in masses where it has room to develop, grouped with shrubs or in the herbaceous border. A few large clumps at 50 c. and 75 c. each, smaller sizes same prices as other plants.

LIATRIS Pycnostachya (Kansas Gay Feather). 4 to 6 feet. July to August.

Most showy and attractive plants, producing spikes of rosy-purple flowers.

LILIUM AURATUM (Golden Banded). June to August. The grandest of all the lilies.

LILIUM CANDIDUM (Madonna Lily). Pure white. An old garden favorite.

LILIUM ELEGANS. Orange Yellow. Blooms in terminal clusters. Very bright and showy.

LILIUM ELEGANS VAR. BICOLOR. Bright Red; otherwise like preceding.

LILIUM ELEGANS VAR. ROBUSTA. Deep orange and very robust in habit.

LILIUM SPECIOSUM VAR. ALBUM (Japan White Lily).

This and the next following are splendid garden lilies, blooming in August and Sept.

MEADOW RUE, see Thalictrum.

MEADOW SWEET, see Spiraea.

MILK WEED, see Asclepias.

*MISCANTHUS SINENSIS (Eulalia Japonica). 6 to 8 feet.

This and the next following are what are generally known as Japan plume grasses. They are very ornamental in growth and reach their height of perfection in Fall when the showy plumes appear. These plumes remain on all Winter and well into the Spring if not exposed to too strong winds, presenting in the meantime a very effective appearance.

*MISCANTHUS SINENSIS VAR. VARIEGATUS. 6 to 8 feet. Foliage striped with white, otherwise like preceding.

*MISCANTHUS SINENSIS VAR. ZEBRINUS. 6 to 9 feet. Foliage with yellow bars.

*MISCANTHUS SINENSIS VAR. GRACILLIMUS. 6 to 8 feet. White mid-rib.

*MONARDA DIDYMA VAR. SUPERBA (Bee-Balm) (Bergamot). 2 to 3 feet. July to October. One of the old garden plants which will ever be popular. It is especially good where used in large masses. Delightfully fragrant, both leaf and flower.

MONKSHOOD, see Aconitum.

MYOSOTIS PALUSTRIS (Forget-me-not). 2 to 3 inches. April to October.

This is the true variety which blooms all Summer and is a delightful light blue color.

MYRTLE, see Vinca.

NARCISSUS, see special Summer List, ready August 15th.

*OENOTHERA SERRULATA (Evening Primrose). 1 foot. May and June.

One of the best clear yellow flowers of low growth, especially showy in the early evening and on cloudy days.

OENOTHERA MISSOURIENSIS. 6 to 12 inches. July.

Mat of bright foliage and large brilliant yellow flowers.

*PACHYSANDRA TERMINALIS. 6 to 8 inches.

Foliage evergreen and very much resembles our interesting native wood plant, Princess Pine. It is perfectly adapted to the shade under trees, or the shady side of a building, and will form a solid evergreen covering where grass will not grow. If planted six inches apart each way it will soon cover the ground. We now have a large stock of it and will gladly quote special prices by the thousand. Samples showing the evergreen character of the foliage mailed without charge.

PADANTHUS, see Belemcanda.

PAEONIES, see page 30.

PANSY, see Viola.

HARDY HERBACEOUS PLANTS.

SPIRAEA ARUNCUS, see Aruncus.

SPIRAEA FILIPENDULA, see Ulmaria.

SPIRAEA GRANDIFLORA, see Astilbe.

SPIRAEA PALMATA, see Ulmaria Purpurea.

SPURGE, see Euphorbia.

*STACHYS LANATA (Woolly Woundwort). 1 to 1½ feet. July and August.

Valuable for its very pearly, velvety foliage.

*STATICE LATIFOLIA (Sea Lavender). 1 to 2 feet. August and September.

A beautiful plant producing a cluster of broad evergreen leaves from 4 to 8 inches long. The flowers are produced on slender wiry stems which branch into a bushy head of branchlets bearing small blue flowers in greatest profusion. Thrives well at the seashore.

STOKESIA CYANEA (Stoke's Aster) (Corn Flower Aster). 1 to 2 feet. July to September.

This recently introduced herbaceous plant has flowered at the nursery and is all that is claimed for it. Flowers, which are produced in very much the same manner as the annual garden aster, are very double, of a light pleasing blue, two to four inches in diameter, and produce a very effective appearance.

SUNFLOWER, see Helianthus.

SWEET-WILLIAM, see Dianthus.

THALICTRUM AQUILEGIAFOLIA (Feathered Columbine). 1 to 3 feet. May to July. White.

THALICTRUM MINUS VAR. ADIANTIFOLIUM. 1 to 2 feet. July and August.

Foliage delicately arranged and graceful.

*THALICTRUM POLYGINUM (Rue Anemone). 2 to 3 feet. July and August. White.

A very graceful native plant which thrives well in the garden.

THYMUS CITRIODORA AUREA (Golden Thyme). Very trailing. Golden variegated.

THYMUS SERPHYLLUM (White Mt. Thyme). May. Forming dense mats of dark green, foliage with white flowers.

TORCH LILY, see Kniphofia.

*TRADESCANTIA VIRGINICA. 1 to 2 feet. June to Aug. Blue; grass-like foliage.

TRADESCANTIA VIRGINICA ALBA. ½ foot. June to August. White form.

TRITOMA UVARIA, see Kniphofia.

TROLLIUS ASIATICA. ½ foot. May. Orange; a rare and beautiful garden plant.

TROLLIUS GRANDIFLORA. Similar to preceding with clear yellow flowers.

TULIPS, see special Summer List, ready August 15th.

*ULMARIA FILIPENDULA (Spiraea Filipendula). 2 to 3 feet. May and June.

Beautiful fern-like foliage which remains fresh and green throughout the Summer.

Flowers are produced on spikes and are white and very graceful.

*ULMARIA PENTAPETALA VAR. FL. PL. 2 to 3 feet. May and June.

Formerly known as Spiraea Ulmaria. Old garden plant; pure white flowers on spikes.

*ULMARIA PURPUREA VAR. ELEGANS (Spiraea Palmata). 2 to 3 feet. May and June. Light pink.

*ULMARIA PURPUREA VAR. RUBRA. 2 to 6 feet. May and June. Deep rose red.

UNIOLA LATIFOLIA (Spike Grass). 2 to 4 feet. Very ornamental.

*VALERIANA OFFICINALIS (Garden Heliotrope). 4 to 6 feet. September and October. White; fragrant.

VERONICA SPURIA (Amethystina) (Speedwell). 1 to 2 feet. May and June.

Blue; in spikes.

*VERONICA LONGIFOLIA VAR. SUBSESSILIS. 2 to 3 feet. July to September.

Spikes of showy flowers of the deepest clear blue make this plant very desirable.

*VERONICA INCANA (Hoary Speedwell). 1 to 2 feet. July to September. Blue, delicate.

*VERONICA SPICATA. 2 to 4 feet. June to August. Deep blue in spikes.

NOTE.—All the veronicas are very desirable garden plants and are especially valuable for cut flowers.

*VINCA MINOR (Evergreen Myrtle) (Periwinkle).

One of the best evergreen plants for covering the ground and is a success in quite shady places, provided the ground is fertile. Its glossy foliage and inverted blue-bell-like flowers in early spring are familiar to all.

*VINCA MINOR VAR. ALBA.

A pure white variety of preceding; not common in cultivation, but should be, as it is quite as easy to grow, and the white flowers are very beautiful.

VINCA MINOR VAR. ROSEA.

A variety of the Myrtle with rosy red flowers of a very pleasing hue.

VINCA MINOR VAR. FL. PL.

Another variety of this Myrtle; with double blue flowers which so resemble a double English violet in appearance as to easily deceive one.

VIOLA CORNUTA (Crested Violet).

Beautiful pansy-like violets with blue flowers and glossy foliage. The plants are in bloom all summer. A very desirable garden plant.

VIOLA CORNUTA VAR. ALBA.

Like the preceding; with pure white flowers.

VIOLA CORNUTA HYBRIDA VAR. LUTEA SPLENDENS.

This hybrid produces beautiful yellow flowers, and is a splendid new plant.

VIOLA ODORATA VAR. FL. PL. (Sweet English Violets).

The true double, sweet-scented English hardy violet. Color is of the deepest blue, and produced in such great profusion in the early spring as to quite cover the plant and fill the air with their delightful fragrance.

VIOLA ODORATA VAR. ALBA.

Like preceding other than the flowers, which are single white.

VIOLA ODORATA VAR. ALBA FL. PL.

Another beautiful form. Flowers double white, very large, tinted with pale blue.

VIOLA TRICOLOR (Garden Pansy).

Our pansies are especially fine and stocky. Prices, each 5 cents; per 10, 40 cents; per 100, \$3.00; per 1,000, \$28.50. Ready March 15th.

WOODRUFF, see Asperula.

WINDFLOWER, see Anemone.

YARROW, see Achillea.

*YUCCA FILAMENTOSA (Adam's Needle).

One of the most valuable plants in cultivation for general garden and landscape planting. Its dagger-like foliage, which is evergreen, forms an attractive clump of foliage from which shoots, in July and August, tall and stately spikes 3 to 6 feet high, bearing large panicles of white lilies which are most picturesque and decorative.

The above Hardy Herbaceous Plants are offered in three sizes, as follows, unless otherwise noted. The very heavy field clumps can only be supplied in the sorts marked with a * to the left.

Japan Iris.

Iris Lævigata Japan Iris or Kæmpferi.

THIS splendid type of Iris is now considered one of the most important of our strictly hardy permanent garden plants. For effective habit and gorgeous display of color it stands alone at its blossoming season, which is June 20th to July 20th here at the Nursery. German Iris have been gone several weeks, Paeonies have past, most Roses are beyond their best and in this grand flower, just in its prime, we have opportunities for special garden effects.

The plants form strong clumps of effective narrow flag-like foliage, one to three feet high, which remains bright and green all summer. The flower stems are slender and graceful, lifting the flower heads well above the foliage, and several flower buds are produced on a single stem.

NOTE.—In the following descriptions, O. S. refers to the outer segments or petals; I. S. refers to the inner segments or petals.

Single Varieties.

- Kathryn.** Early, tall and vigorous; O. S., broad, pale blue, beautifully veined royal purple; I. S., upright, narrow, deepest purple, margined white.
- Phyllis Leighton.** Late, low to medium, very free, entire flower of the richest deep blue, suffused slightly with purple.
- Rosy-Morn.** Mid-season, tall and graceful, flower medium to large; O. S., broad and reflex, white at base shading to deep rose at margins; I. S., upright, creamy white at base, shading to clear rose on margins.

Double Varieties.

- Annabelle.** Low to medium, early, medium size, segments of uniform size forming flat flower, white at base changing to deep blue on margins, effective.
- Blue Jay.** Late, medium tall, vigorous, very large, splendid form and substance, segments broad, almost uniform in shape, deep yellow at base changing to a soft azure blue, becoming deeper at the margins and throughout beautifully marbled. Style waxy white bordered deepest blue.
- Dinah.** Mid-season, very tall and much branched, medium to large, the broad segments so much ruffled as to give a very double effect, deep blue suffused with deepest royal purple, the splash at base is conspicuous, style upright and crested.
- Francella.** Early, medium tall, medium size, segments uniform size and broad, almost white at base changing to deep rose at margins, effective.
- Gold Bound.** Mid-season to late, very robust, stems branched, flowers of larger size, segments so full as to present a very solid flat effect, the margins beautifully ruffled and reflex, of the purest waxy white showing the yellow markings at the base with fine effect.
- Hannibal.** Late, tall, very free bloomer, fine form and substance, segments broad and uniform size, chalky white beautifully veined with deepest blue, style upright, showy, deep blue, paler blue markings, beautifully crested.
- Mahogany.** Late, medium tall and branched, large velvety deep mahogany red showing richest splash of deep yellow at base, segments so full and ruffled as to build the flower well up in the center, style so freely crested as to further double the flower, very unique and beautiful.
- Pyramid.** Early to late, very strong grower and free bloomer, of largest size and splendid form, segments light blue at base shading to deep blue on margins suffused with royal purple, one of the best for general culture.
- Purity.** Early to mid-season, medium grower, medium size of the purest waxy white, flower very flat and effective, O. S. conspicuously banded with yellow.
- Robt. Craig.** Mid-season to late, medium tall, very large and splendid form, pure white with occasional flowers showing rich rosy maroon splashes at base of segments on margins, the style is also sometimes marked with rich color.
- Victor.** Late, medium tall, fine form, delicate porcelain blue, faintly marked with deeper blue.

New Varieties imported direct from Japan

and have flowered in the Nursery and the description can be depended on.—Order by number if you prefer.

- No. 3. Tall, vigorous, pure white, very fine, single.
- No. 15. Urc-in. Double, mid-season, tall and much branched, flower large and very full, segments slightly cup-shaped, color pale blue white at base changing to rich clear blue at margins, the segments being richly veined with deep blue.
- No. 18. Kumo-no-sho. Double, mid-season, tall, good size, white at base, freely veined rose, which suffuses the segment-at outer margin.
- No. 20. Kumo-no-nye. Late, double, splendid form, richest velvety royal blue, suffused slightly with royal purple, the brilliant yellow throat of each segment adding to the color effect; style upright and much crested of a deep blue black.
- No. 31. Early, tall, robust; O. S., white, often bordered with rose; I. S., small and upright sometimes rose and margined with deepest rosy red; style upright, almost white and showy.
- No. 45. Double, early, very tall and branching, flower large and showy, segments rich blue penciled deeper blue with white radiating lines, spring from a base of deepest yellow; style upright and crested.

HARDY HERBACEOUS PLANTS.

PAEONIES, HERBACEOUS. The Paeony is today without a rival as a hardy garden favorite, and quite naturally so, as no other hardy garden plant thrives with as little special care and produces as fine a display of gorgeous blooms. The great diversity of color and form which can now be obtained, very much increases the importance of the Paeonia.

Selected List of Varieties.

NOTE. The number to the left of the variety indicates the sizes we have to offer of that variety.

Our roses should not be confounded with the department store article often offered. Our roses are all selected strong field grown dormant plants dug fresh from the open ground and securely packed for each order.

Garden Hybrid Roses---Strictly Hardy.

This class of roses blooms profusely in June and at intervals throughout the Summer and Fall. The popular hardy garden roses mostly belong to this class and are always satisfactory.

Do not allow roses to suffer for want of plenty of fertilizer, as they are gross feeders, and only when they have plenty to feed on can they be expected to produce best results.

- Alfred Colomb.** Brilliant carmine crimson; very large, full, and of fine globular form.
- Anne De Diesbach.** (Syn. Glory of France.) Carmine, a beautiful shade; very large. A superior garden sort; fragrant.
- Baby Rambler.** See below.

- Princess Camille De Rohan.** Deep velvety crimson; large, moderately full.
- Ulrich Brunner.** Brilliant cherry red, a very effective color; flowers of fine form.
- Victor Verdier.** Bright rose, with carmine center, a very clear shade of color.

Hybrid Tea Roses.

Very free bloomers; hardy with slight protection. These delightful, delicately formed and fragrant roses are very popular in gardens where good culture is provided, as they bloom profusely all the growing season and are ideal in form, color, fragrance and foliage.

- Baby Rambler.** The rose hybridists certainly made a remarkable happy combination when they succeeded in creating this wonderful new rose. Imagine a bushy rose just right for the flower garden or a pot plant as to size with all the beauty of color and great clusters of the crimson Rambler and add to this that it will bloom constantly all summer. Perfect in form and color.
- Burbank.** Graceful rosy pink. A constant bloomer, in clusters.
- Captain Christy.** Rosy pink, perfect shape, tea scented.
- Clothilde Soupert.** Medium size; very double and beautifully imbricated, produced in clusters; pearly white.
- Duchess of Albany.** A sport from the well known La France. Quite distinct in color, rich, deep, even rose tint.
- Gruss an Teplitz.** Color scarlet shading to velvety crimson, very fragrant, a free grower and most profuse bloomer; handsome foliage, especially valuable.
- Hermosa.** Soft pink, cupped, fine bloomer, very reliable old rose.
- Kaiserin Augusta Victoria.** An extra fine white variety, faintly blended with cream color; very large, full and double, almost perfect in form.
- Killarney.** A charming Rose of robust habit; blooms large, buds long and pointed.
- La France.** Delicate silvery rose, changing to silvery pink; very large, full, of fine globular form; a most constant bloomer.
- Maman Cochet.** Flowers large, full, stem carmine rose, shaded with salmon yellow.
- White Maman Cochet.** Pure white, tinged pink, the best white bedding Rose, extra fine.

ROSES---Continued on next page.

"Roses sent me last Spring are thriving wonderfully, notwithstanding the unfavorable season."

Rambler Roses ^{and} other Hardy Climbing Roses.

These are all splendid pillar and arbor roses; are also very effective for planting along fence lines, etc.

Baltimore Belle. Pale blush, becoming nearly white; compact and fine.

Crimson Rambler. The wonderful Japanese Rose is one of the most important and valuable acquisitions of recent years.

Dorothy Perkins. Very double and are borne in clusters of ten to twenty. The color is a clear shell-pink.

Empress of China. Dainty carmine pink roses in clusters, blooms all summer.

Lady Gay. Similar to the popular Dorothy Perkins, but lighter in color.

Manda's Triumph. Double pure white in clusters, very vigorous.

Multiflora. A charming species. Great clusters of white single flowers, showy red fruits which last all winter.

Philadelphia Rambler. In rapidity of growth it rivals the Crimson Rambler and also surpasses it in beauty of foliage. The blooms are larger than the Crimson Rambler and full to the center and of a deeper crimson color, and is in full bloom before the Crimson Rambler is showing color.

Pink Rambler. Flowers medium size, pink in clusters, very pretty.

Pink Roamer. Pink, splendid climber.

Prairie Queen. Bright rosy red, extra.

Setigera. The Michigan or Prairie Rose. Large single flowers, of a deep rose color.

South Orange Perfection. Double flowers in great profusion; color soft blush pink at the tips, changing to white.

Sweet-Brier. Old favorite with fragrant foliage.

HYBRID SWEET-BRIER.

Anne of Gerstein. Dark crimson.

Brenda. Peach, bright yellow anthers, fine.

Trier. (New). Originated by the famous German rosarian, Peter Lambert, and described by him as follows: "An ever-blooming Rambler rose. Every shoot produces blossoms until fall. Flowers are creamy white with dark yellow anthers and are borne in large clusters. Buds light rose color and very firm."

Universal Favorite. Double, clear rose in clusters, very vigorous, beautiful foliage.

White Rambler. White, very vigorous.

Wichuriana. Memorial Rose. It is a low trailing species. Pure white, single when fully open, very fragrant.

Prices see below.

Roses---Choice Hardy Garden.

Austrian Copper. A rare old rose of most remarkable copper-red color.

Austrian Yellow. A good old garden rose seldom seen now-a-days.

Blanche Moreau. (Moss.) Pure white, large, full, and of perfect form.

Blanda. Single pink flowers in greatest profusion followed with showy bright red fruits which persist throughout the early winter. The twigs are of the brightest crimson.

Damask. Popular old-time rose of delightful fragrance and delicate almost tea rose like delicacy in the opening buds.

Harrison's Yellow. Golden yellow, medium size; semi-double. A free bloomer.

Lucida Alba. Beautiful white form of one of our pretty low native roses, very fine for massing in shrubbery.

Madam Plantier. Pure white. Produced in great abundance; vigorous, bushy habit.

Persian Yellow. Bright yellow, small, nearly full.

Salet. (Moss.) Deep pink colored buds, surrounded with a mossy fringe and crest. A fragrant and very beautiful moss rose.

Soleil d'Or. (Golden Sun.) Color varying from yellow to reddish-gold, shaded with nasturtium red.

Spinossissima. (Scotch.) Dainty little roses, seldom getting more than two feet. Flowers light rose pink to white. This is a splendid little rose for naturalizing and will grow in very dry rocky places. It is being much advertised just now.

York and Lancaster. Produces great quantities of handsome large semi-double blooms which are splashed and striped in a most interesting manner. Bright red, white and yellowish tints.

Prices see below.

Rosa Rugosa and its Hybrids.

Rosa Rugosa in its several forms not only makes an effective individual plant, but is very desirable for hedges and generous masses.

Agnes Emily Carmen. A rich red hybrid; semi-double; pointed bud.

White of Coubert. Semi-double, pure white, long pointed buds, very desirable.

Madame Geo. Bruant. In the bud state the flowers are long and pointed, when open, semi-double; pure white and fragrant and produced freely.

Nova Zembla. This is a pure white, beautifully formed rose, very fragrant, vigorous and free blooming.

Rugosa Alba. Single pure white flowers, highly scented; a splendid shrub-like rose.

Rugosa Rubra. Flowers single, of a most beautiful rosy red, succeeded by large berries of a rich orange red color.

If in doubt as to the varieties of roses wanted for any special purpose we will be glad to make selections for you.

Hardy Garden Grapes.

THE wonderful development of the American Hardy Grape, through the enthusiastic grape breeders' persistent endeavor in this country, has reached such a high stage of perfection that to-day many prefer them to the choicest European kinds.

***BACCHUS.** (Black). The wine grape, very rapid grower, fruit rich, sprightly flavor, berries small in compact clusters.

BRIGHTON (Red). Bunches large and well formed; berries medium to large, of good flavor. Excellent early grape.

CAMPBELL'S EARLY. (Black). This superb new grape is fulfilling the promises made for it remarkably well. It forms large and handsome clusters, thickly set with large round berries. Flavor is rich, sweet and delightful. Very early.

CATAWBA (Red). This excellent table and wine grape has round berries; when fully ripe they are a dark copper color.

***CONCORD (Black).** The fine market leader, with large, handsome clusters of large, luscious berries. Entirely hardy, productive and reliable.

***EATON (Black).** Very large, a most delicious table grape of highest quality.

***DIAMOND (White).** This handsome and valuable grape is a seedling of Concord, has the same sturdy qualities of vine, and ripens its fruit several weeks earlier.

NIAGARA (White). Its clusters are large and handsome, compactly filled with large berries and having a thin but tough skin. Flesh is slightly pulpy, tender, sweet and delightful.

POCKLINGTON (White). Clusters and berries large, light golden yellow when fully ripe; sweet and tender, with little pulp.

WORDEN (Black). This seedling of Concord is larger than the type in bunch and berry, of better flavor, earlier, as hardy and healthy in every way.

Pulverized Manures.

BOTH first cost, economy and ease of applying are too important factors to disregard in the handling of fertilizers. Commercial fertilizers are no doubt, all right for special purposes, but in pulverized natural manures we have nature's own way and in a most convenient form for handling. They are just as they come from the stockyard pens, only they are thoroughly dried and put through pulverizing machines. If you have never used these pulverized manures, you will be agreeably astonished with the results.

Applied on the lawns in early spring or fall and a deep green growth will quickly follow, which will remain throughout the season under favorable conditions. For applying at time of seeding down new lawns, nothing will give better results. For lawns apply on the surface broadcast 100 pounds to the 1,000 square feet; for the garden, two to three times this amount, depending upon the soil.

Inquire for special printed matter.

Pulverized Sheep Manure and Pulverized Cattle Manure. These manures vary but slightly in their chemical make-up, and can be used with seemingly equally good results, either having its staunch friends.

Prices of Pulverized Manures.

In bags, 25 or more pounds and less than 100, per lb., 3c.

In bags, 100 or more pounds and less than 500, per lb., 2c.

In bags, 500 or more pounds and less than 2,000, per lb., 1½c.

In bags, 2,000 lbs. (ton), \$25.00; five tons, \$115.00, F. O. B. New Haven, Conn.

Car lots, in bag or bulk, 15 to 20 tons, f. o. b. your station, prices promptly quoted.

Five ton lots or less delivered from our own warehouse here at New Haven, Conn. Car lots shipped direct from Chicago.

Hardwood Ashes (Edgewood Brand)

AS a good all-round fertilizer, our Edgewood Brand Canada Unleached Hard-Wood Ashes, mixed half and half with Edgewood Ground Bone, have unchallenged value. For lawns, for fruit and ornamental trees and plants, they are superior to stable manure, and far less expensive. They carry no weed seeds, are odorless, clean and easy to handle. The beneficial effect resulting from their use is immediate.

Spread evenly from one to two tons to an acre, according to the condition of the soil, or, for small lawns, 100 to 150 pounds to 1,000 square feet of sod.

Prices: We put them up in 100-pound bags: 100 pounds for \$1.50; 200 pounds for \$2.00; one ton, \$18.00, including bags. Special prices on car-load lots in bulk or bags.

Ground Bone (Edgewood Brand)

FOR general fertilizing purposes on the lawn, meadow or in the garden. The finer particles are immediately beneficial, the coarse keeping up the supply of plant food for a long period. Use about one-half the amount advised for Wood Ashes at same time you apply the Wood Ashes. Per one-hundred-pound bag, \$2.50; per ton of two thousand pounds, \$35.00.

NOTE.—A charge to cover cost of hauling made on ton lots and over when delivered by us in city or vicinity on all the above fertilizers. Less than ton lots delivered in city and vicinity at catalogue prices.

Lawn Grass Seed Mixtures.

We offer only the best grade of grass seed the market affords, and as you will note, offer it by weight. The old way of selling seed by bulk measure was at best very unsatisfactory to the purchaser. Modern recleaning machines now make possible the removing of much of the chaff and foreign matter, so that seed so treated is very much heavier for the same bulk, much less quantity being required. See instructions on each package.

Quantities to use of the following mixtures: 1 lb. to 400 square feet; 100 lbs. for one acre.

Edgewood Mixture for General Use,

Composed of a variety of grasses, so as to produce a permanent velvety lawn under varying conditions and in the quickest time. Especially valuable for seeding newly graded lawn areas, pleasure grounds, golf links, etc., and for re-seeding the bare places that will appear in established lawns, and for thickening thin lawns.

Edgewood Shady Place Mixture.

A mixture of varieties specially suited for shady places, otherwise similar to the above.

Prices for the Above Mixtures.

Per lb., 25 cts. (by mail 35 cts.); 3 lbs., 65 cts. (by mail, 80 cts.); 5 lbs., \$1.00; 10 lbs., \$1.85; 15 lbs., \$2.75; 25 lbs., \$4.25; 50 lbs., \$8.25; 100 lbs., \$16.00.

Specimens for Immediate Effect.

At the nursery we give special attention to growing into large sizes many kinds of Fruit and Ornamental Trees, Shrubs, Vines, etc., for by their use much quicker results can be obtained than by the use of smaller stock. Many instances occur where the purchaser gladly pays the additional charge for such stock over the usual sizes.

Particular attention is called to our large collection of specimen Evergreens, ready for immediate effects. A visit to the nursery is desirable where the selection of individual specimens is required, however, by sending us a description of what is desired we will make careful selections. By this method we frequently fill orders to the entire satisfaction of the purchaser.
